

# SunTouch™ Automation System

The standard SunTouch™ system includes:

- Power center with push-button digital control panel and backlit LCD readout
- One circuit to control filtration and two additional accessory circuits available
- Two valve actuators for automatic switching between pool and spa mode (an optional third valve actuator can be added for use with auxiliary functions, such as solar panels)
- Two sensors to monitor air and water temperatures
  - Built-in diagnostics
  - Support for IntelliFlo® vs-3050, IntelliChlor®, and QuickTouch® Wireless Remote

## Replace your manual time clock with the convenient, economical control solution

If you're still setting your filtration and heating schedules with an antiquated time clock, it's time to upgrade with SunTouch™ automation system! Designed for pool and spa combinations that share a common filtration system, SunTouch does all the work while you relax. Per your programmed schedule, SunTouch rotates motorized valves from pool mode to spa mode, allowing the heater to bring your spa up to your pre-selected temperature. When the programmed time is finished, the system switches back to pool mode. Should you decide to take an unplanned dip, simply switch to manual mode and control the valves with the touch of a button. Auxiliary circuits allow you to operate additional features, so you can set run times for your automatic cleaner, switch your pool lights on and off, or even schedule operation of your solar heating system.

What's more, SunTouch can extend your pump and heater life, because your equipment won't be running when it doesn't need to. And you can even save on your utility bill by scheduling operation during off-peak electrical rates.

## Take your pool and spa enjoyment to another level

Your SunTouch System will give you even greater benefit when integrated with these innovative new products from Pentair Water Pool and Spa®:

**QuickTouch® Wireless Remote** allows you to ready your pool or spa for relaxation from the comfort of your poolside lounge – or almost anywhere up to 150 feet from your pool equipment area.

**IntelliFlo® vs-3050 Variable Speed Pump** Reduces your utility costs by hundreds per year with this breakthrough in energy efficiency and whisper-quiet operation. See the IntelliFlo vs-3050 Cost Calculator at [www.pentairpool.com](http://www.pentairpool.com).

**IntelliChlor® Chlorine Generator** converts ordinary table salt into pure chlorine, keeping your water clear and safe. No more handling and storing chlorine, and no more odor, stinging eyes, irritated skin, or bleached-out swimsuits!
